## February 2007

February is National Heart Month- Heart disease is the number one cause of death in the U.S. We all know what we need to do to take care of our bodies but sometimes it is hard to take action and exercise, eat right and LISTEN to our bodies.

Light workers, energy healers are feeling the increased vibrations in the universe.

2007 INCREASING THE FIELD OF VISIONS

Light Involution And Evolution

By Gillian Macbeth-Louthan

As the universe expands to fit its awesome growing self it asks all of its creations to become more, to receive more, to create more. It pushes itself past previous boundaries and expects all of its creations to follow suit. In 2007 a cosmic pulse, a galactic explanation point, surrounds the immediate 144 solar star systems. Declarations of expansion are heard loud and clear through time and space.

Weighting one's self with the past stops the expected wave of creation from reaching earth's protective atmosphere. In this new episode of light, 'the buck stops nowhere', creational responsibility is to birth as a whole unit, connecting spatially with those of a tangible light pulse.

This is just part of the article, there is so much to read and understand. Another web site [www.whatsuponplanetearth.com](http://www.whatsuponplanetearth.com)

We are fortunate to have seminars close by to increase our knowledge and experience.

There are many changes at Front Street Healing Center. I am the only one who is at the center regularly. Kathy will be doing healing work in her home and occasionally at Front Street. I envision someone stepping forward to be in the healing space so that the doors will be open 7 days a week. I would like to thank all the individuals who have contributed books to the library at Front Street for everyone to enjoy. I feel blessed to learn "Light Language" from Marcia & Joan, also "Process Acupressure" from Ann. All the experiences have added so much to my "healing tool box".
